**1971 DIRECTORY**

# — "The Performers" —

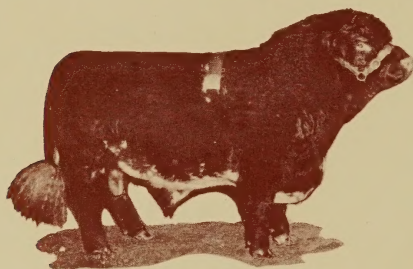

**SANGAMON BEACON x**

Best summer yearling bull, 1967 Inter'l. Weighed a ton at 4 years. Is long and growthy.

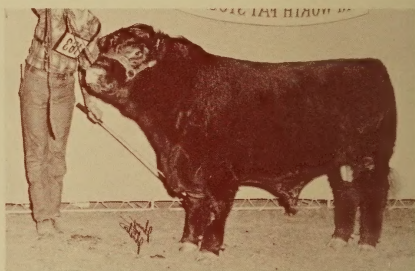

**SANGAMON HIGHLAND LEADER x**

One of the three great summer yearling bulls of 1968. Wt., 1,900 lbs. at three years.

**SANGAMON BULLDOZER x**

Senior champion, Inter'l. Sire of champions and winning gets. Wt., 2,100 lbs. in breeding condition.

**SANGAMON WAR ADMIRAL x**

Junior champion at many 1969 shows. A very long, tall bull. Wt., 1,860 lbs. at two years.

Sangamon's aim is to breed 1,900 to 2,100 lb. bulls that are long, growthy and thick. The kind that will convert grain and roughage efficiently and produce finer grain, quality beef quickly and profitably. Breeders from Santo Domingo toured the United States and Canada and came back to Sangamon and purchased several bulls. Place an order for a Sangamon bull now and be ahead of the crowd in 1971.

# Polled Shorthorns...

## America's First Developed Beef Breed

Polled Shorthorns were the first major beef breed to be developed in the United States. The origin of the breed were twin "sport" (naturally hornless) heifer calves born in October 1881, on the farm of Col. Charles McCormick Reeve, Minneapolis, Minn.

These two heifers were purchased by Capt. W. S. Miller, Elmore, Ohio, in 1888. They were Nellie Gwynne and Mollie Gwynne and are recorded in Volume 33, page 728 of the American Shorthorn Herd Book. A half brother to these heifers, called King of Kine, was also born without horns, purchased by Captain Miller, and although it meant close breeding, was used on his half sisters and the horned cattle in the Miller herd with excellent results.

As early as 1860, J. F. Burleigh, Mazon, Ill., came into possession of a Polled bull sired by a Shorthorn bull. The editor of the *Prairie Farmer* in the June 22, 1889 issue remarked "Mr. J. F. Burleigh is probably the first breeder who systematically attempted to breed the horns off the Short-Horn. This was 25 years ago. By careful selection, he now has his herd so bred that no vestige of horns appear."

Z. T. Dunham, Dunlap, Iowa, was another early pioneer polled breeder. "Mulley" cows existed in the Dunham herd as early as 1850. In 1883, Dunham undertook to build up a registered Polled Durham herd. By 1893 he had a herd of 56 breeding Polled Durhams.

Miller, Burleigh and Dunham were three of the twelve men who signed the petition for charter for the American Polled Durham Breeders Association which was organized in Chicago, November 14, 1889. Miller and Burleigh were two of the eight men present at that organizational meeting.

Wm. Crane, Tippicanoe City, Ohio, was the group's first president; John R. Shafar, Middletown, Ohio, vice president; and A. E. Burleigh, Mazon, Ill., secretary-treasurer. Others on the board were Salem R. Clawson, Clawson, Ohio; W. S. Miller; J. F. Burleigh; and Leander Caywood, Fredericktown, Ohio.

In the second edition of Volume I of the American Polled Durham Herd Book, published in 1898, 89 members were listed. The book contained 1,321 pedigrees. Of that number 487 were bulls and 834 were females.

Pedigrees were entered from breeders of 18 states and South America. The states represented were: Illinois, Michigan, Ohio, Iowa, Indiana, Wisconsin, Colorado, Pennsylvania, Nebraska, Kentucky, Texas, Missouri, South Dakota, Minnesota, Kansas, New York, Tennessee and West Virginia.

# Buyers Willing To Pay More For Polleds

Breed advantages . . . and Polled Shorthorns have many . . . are meaningless if they can not be translated into a "dollar and cents" superiority.

Sales, however, indicate that buyers are willing to pay more for Polled Shorthorns. In district sales . . . in national sales . . . in production sales, polled bring the top dollar.

The top-selling bull at Shorthorn-Polled Shorthorn auctions in 1969 was a polled bull, Kinnaber Leader 22nd x, selling at the Production Indexing Center, Stanford, Mont. He brought \$7,200 for a two-thirds interest. This was more than twice as much as was paid for the top Shorthorn bull during the year.

The top-selling bull, so far this year, is Sutherland Citation x. Two-thirds interest sold for \$13,200.

A new Polled Congress record was set in 1970 when 28  $1/3$  bulls averaged \$1,307 and 45  $1/3$  lots, \$1,083. This was \$251 per head higher than the previous Polled Congress record set in 1951. The bulls in this sale also set a new Congress record . . . \$441 per head higher than the previous record set in 1952.

The top-selling bull at the 1970 Iowa Beef Improvement Sale, Colfax, over all breeds was a Polled Shorthorn selling for \$3,400.

The top-selling bull over all breeds at the October sale, National Research Center, Leon, Kans., was a Polled Shorthorn selling for \$1,000.

The Polled Shorthorn price advantage is obvious at nearly every sale where they are offered with Shorthorns. The exact advantage cannot be measured since sale reports are not complete enough to make a reliable comparison.

At the 1969 Omaha Bull Sale, polled bulls averaged \$577 as compared to a \$431 average for Shorthorns. This was a \$146 advantage for polled represented with over a third more entries.

At the 1969 Hawkeye Downs Sale, 11 of 18 polled bulls sold for over

\$500 with only eight of 39 horned bulls selling in the upper category.

The Stanford Production Indexing Sale was the top averaging Polled Sale of 1969 with 29 1/3 bulls selling for \$1,036 each. In addition, Sutherland, Windholme and Questing Hills stood in the top ten averaging sales of the nation in 1969.

Sales in which the top-selling bull was a Polled Shorthorn in 1969 were: Dixie National, Missouri State Spring Sale, North East Missouri Sale, Bull-A-Rama, Kentucky National, North Dakota Winter Show, Hawkeye Downs, Central States, Republican Valley, Alabama State Sale, Tennessee State Sale, Iowa Beef Improvement Ass'n Performance Tested Bull Sale, Montana Beef Bonus Sale, Marshall County Sale, Pennsylvania Spring Sale, Wisconsin State Sale, Tennessee National, Missouri State Fall Sale and Nebraska Futurity.

In 1970 Polled Shorthorn bulls topped the Red Bluff, Klamath, Iowa Royal, Missouri State Spring Sale, Kentucky National, North Dakota Winter Sale, Hawkeye Downs, Inland Empire, Northeast Missouri, North Central Iowa, Alabama State Sale, Republican Valley, Oklahoma State, Beef Bonus, Dickinson Range Bull, Northern Michigan, Bull-A-Rama, Central States, Northwest Missouri, Eastern Ohio, Eastern Nebraska Performance Tested Sale, Marshall County and Hawkeye Downs.

If you want higher sale returns, it is obvious you should go Polled Shorthorn.

## ALABAMA

**BIGLAWN FARMS**, Guy J. & Mildred Reynolds, Owners, Rt. No. 2, Toney, Alabama 35773. Phone—(205) 828-4419. Located 16 miles North on Pulaski Pike from Huntsville, Alabama. 75 cows and bred heifers. Herd Sires: Sutherland Summet and Biglawn Juggler.

# LET'S TALK ABOUT MODERN POLLED SHORTHORNS

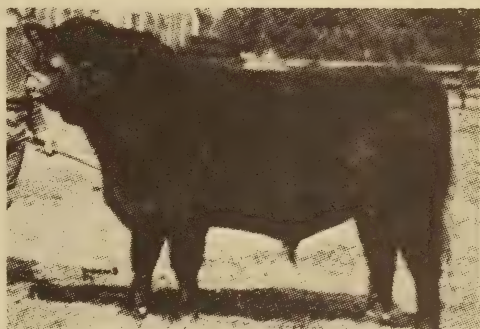

## THAT'S THE METEOR KIND

GLORIADALE METEOR 34th x really started our modern production. His calves have consistently won or stood well up—and have been top sellers wherever offered. Muscling, scale, with quality, the three most essentials today show up in his calves.

## NOW WE'VE ADDED

### SUTHERLAND GOLIATH x

One of the breed's bigger two-year-old bulls. In service here principally on daughters of Meteor 34th x.

Our business is to produce more of the big, well muscled kind—See them at the farm or look for them at the top Polled Shorthorn Sales. Jim and I, or John and I—makes no difference, will be pleased to welcome you at the farm anytime.

## TYNYWTRA FARMS

## The Tops Are in MICHIGAN

The best measure of a product is the demand it creates, the quality it displays and the resultant number of sales it generates.

For top quality, long meaty Polled Shorthorns that sell themselves look to MICHIGAN.

*Plan soon to come and see these herds:*

# Polleds Dominate Breed Shows

Since the 1969 National Western, Polled Shorthorns have shown an amazing domination of championships at combination Shorthorn-Polled, Shorthorn shows.

Of 48 major shows studied, figures show that Polled Shorthorns won . . .

—72 of 96 grand championships, or 74 percent

—129 of 192 grand and reserve grand championships, or 67 percent

—At 12 major shows, Polled Shorthorns won all grand and reserve grand championships.

Polled Shorthorns won the following grands and reserve grands:

# Polled Achievements

At the 1970 National Western, all female championships and five of the eight bull championships went to Polled Shorthorns in addition to firsts in the junior and senior gets of sire.

The first "Sire of The Year" Award in the Shorthorn breed went to the Polled TPS Coronet Leader 21st x.

The top recorder for 1969 was R. D. Magill, Verona, N.D.

---

## Polleds Assume Greater Importance In Breed

If sale and show results weren't ample proof of the growing stature of Polled Shorthorns within the Red, White and Roan breed, registration statistics confirm that polled are becoming more popular within the breed.

The 1970 registration statistics of the American Shorthorn show that registrations were up 5.6 percent. Polled Shorthorns, however, showed a whopping 19.7 percent increase.

Polled Shorthorn registrations since 1963 and their percentage of total A.S.A. recordings are:

Year	Registrations	Percent of Total
1963	10,426	27%
1964	11,243	28
1965	10,613	28
1966	10,934	28
1967	11,068	28
1968	12,727	29
1969	10,241	30
1970	12,261	34

## **JUNIORS: JOIN THE BREED WITH THE FUTURE . . . .**

Every breed has its leaders. A survey of any, or all beef breeds would soon indicate that many of these leaders got their start in the purebred business as 4-H and FFA beef breeders, feeders and exhibitors.

There is a bright future in the Polled Shorthorn business for alert young men and women to become the "Builders Of The Breed" of tomorrow. Polled Shorthorn heifers make ideal projects. Their docility . . . . their response to feed . . . . their profitable carcass characteristics mark them as good investments.

Why not make your heifer project a Polled Shorthorn project? Enjoy showing success and at the same time build a herd that will like it has for so many, provide funds for a college education and the nucleus for a valuable breeding unit for your farming future.

# Polled Shorthorn Gaining Ability Tops At Colfax

At the 1970 Iowa Beef Improvement Ass'n Performance Test, Colfax, Polled Shorthorns led in average daily gain after the 140-day test. Here are the statistics:

	Average Daily Gain	Weight Per Day Of Age
Polled Shorthorn .....	3.35 lbs.	2.85 lbs.
Charolais .....	3.24	2.95
Red Angus .....	3.01	2.62
Hereford .....	2.98	2.61
Shorthorn .....	2.81	2.62
Polled Hereford .....	2.80	2.60
Angus .....	2.73	2.53

## Polled Shorthorns Top Stanford Weight Gains

Polled Shorthorns topped all English breeds in daily gains at the 1970 Production Indexing Center, Stanford, Mont.

The gains recorded were:

Polled Shorthorns .....	2.31 lbs. average daily gain
Herefords .....	2.07 lbs. average daily gain
Red Angus .....	2.12 lbs. average daily gain
Angus .....	1.96 lbs. average daily gain

The Simmental-Hereford crossed bulls averaged 2.07 lbs. per day, but the Simmental-Hereford-Shorthorn crossed bulls averaged 2.63 lbs. This is just another indication of the superior gaining ability achieved with Reds, Whites and Roans.

# Polled Top Illinois Gain Study

A summary was completed recently involving Illinois Beef Production records for a two-year period. A total of 13,371 calf records were summarized.

Polled Shorthorns headed the list, again substantiating their claim of more profitability. Here are the interbreed statistics:

Breed	205-day Adjusted Weight
Polled Shorthorns	459 lbs.
Shorthorns	444 lbs.
Herefords	424 lbs.
Polled Herefords	423 lbs.
Angus	423 lbs.

## Polleds Gain Best

Results of the 1966-67 Michigan Bull Test show Polled Shorthorn superiority. Results of the 140-day test by breeds:

Breed	140-day Total Gain	Average Daily Gain
Polled Shorthorns	.409 lbs.	2.92 lbs.
Polled Herefords	.329	2.35
Herefords	.329	2.35
Angus	.306	2.18

## WHY POLLED?

They are hornless . . . no losses from horn-damaged carcasses.

They get bigger and do it faster. Just study the performance results in this directory.

They are more efficient.

They have a quiet, docile temperament.

No dwarfism.

More prolificity. Polled Shorthorns produce regularly. "Working" cows up to 15 years of age are common among Polled Shorthorns.

## NOTES

At sales . . . at shows . . . at performance testing stations . . . and in private sales, **POLLED SHORTHORNS** lead the way. They gain faster and put those pounds on a bigger, trimmer, longer, better muscled frame. It is no wonder that more buyers are demanding **P O L L E D SHORTHORNS** than ever before.
